# PCTO 2024 Report Monsù Lorenzo 5BM

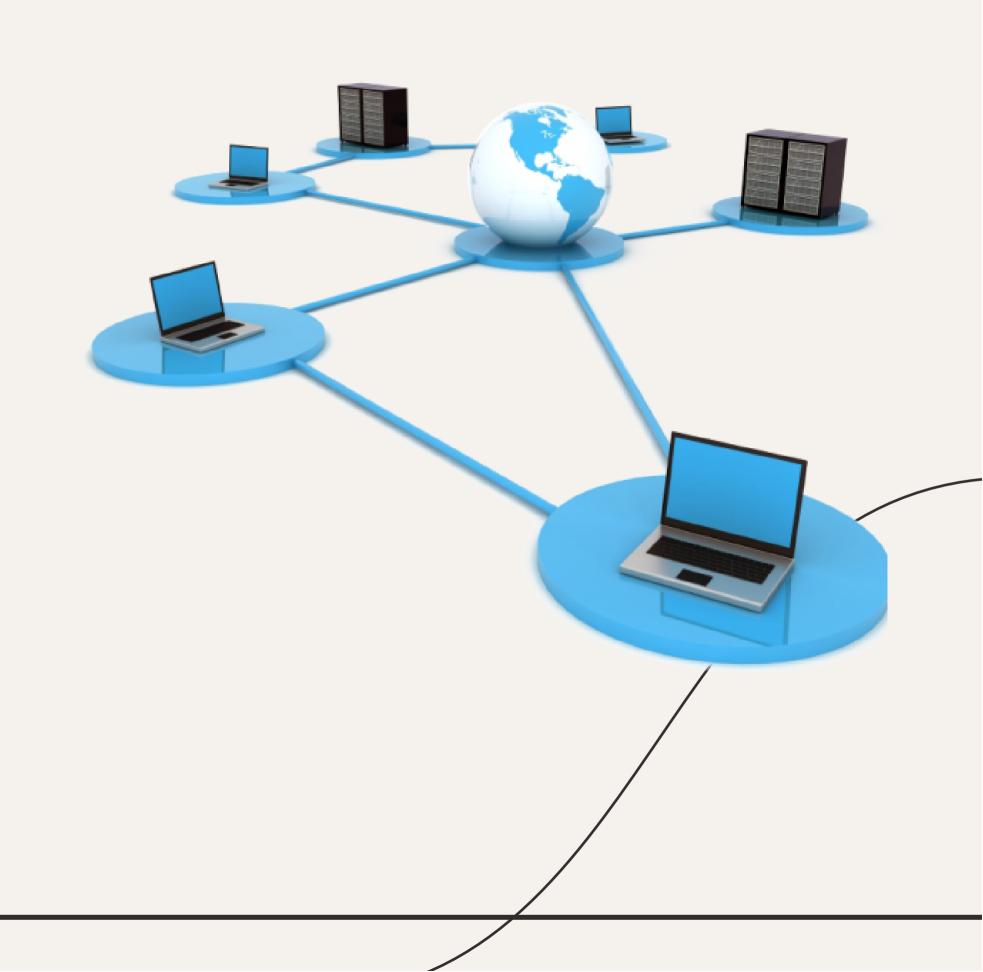

## Who is Apra?

I completed my PCTO (Paths for Transversal Skills and Guidance) during the following periods: May 17 - June 7 and September 9 -September 16 APRA S.r.l. is a historic company based in Jesi, in the Marche region, specialized in the development of software solutions and IT services. Founded with the aim of supporting companies in digital transformation, APRA offers a wide range of products and services aimed at improving operational efficiency and corporate data management.

## Duties performed

In this experience I was supported by the company's group of system engineers where they taught me many things from a theoretical point of view (for example firewall, server, VPN) but also practically. They had me prepare various tablets/PCs to be delivered to other company employees.

### Duties performed

in a short period of time they had me design a software together with one of my company who was also on an internship, useful for dividing the invoices of the company's customers

#### Skills learned

In this short period, in addition to technical skills, I learned how to work in the company and how to be in the office, given that all day I was with other people who worked with us who showed me and explained what they were doing.

#### Conclusion

In conclusion, the PCTO was a fundamental experience for my personal and professional growth. The skills and knowledge acquired are an added value that I will take with me into my future work.
